

The World Bank

**Carbon Finance Assist (CF-Assist) &
Korea Green Growth (KGG) Programs**

Pablo Benitez, CF-Assist Program Manager
Eun Joo Allison Yi, Korea Green Growth Trust Fund Coordinator
September 30, 2013

CF-Assist

Program Objectives: 2013-2015

CF-Assist

Sub-Program Description (1)

Policy Instruments &
Carbon Pricing

To strengthen the capacity of stakeholders to identify, assess and utilize various types of policy and market-based instruments in support of LED goals

Climate Finance
Readiness & NAMAs

To support countries in their climate finance readiness process and development of NAMAs

Scaling up Climate
Action in Cities

To support the development of sustainable, climate-smart cities

CF-Assist

Sub-Program Description (2)

	LED Policy instruments and Carbon Pricing	Climate Finance Readiness and NAMAs	Scaling up Climate Action in Cities
1. Structured Learning	E-learning: Policy instruments for Low Emission Development; Low carbon development modeling	E-courses on Climate Finance and LED Investment Planning	E-courses on energy efficiency (EE) for cities and climate action planning
	Specialized learning modules and webinars on Emission Trading Schemes, carbon taxes and other market-based instruments	Climate Finance knowledge portal	Collaborative platforms on climate friendly urban planning and EE
2. Knowledge Exchange	Global and Regional Climate and Carbon Finance Fora (i.e. Carbon Expo, AFR Carbon Forum, LAC Carbon Forum, India Carbon Conclave)	Regional S-S Knowledge Exchanges on key Climate Finance priorities in collaboration with CIFs	Virtual dialogues on EE for cities
		Virtual dialogue webinar series “vShare: Climate Change Talks” (UNDP/poverty reduction series)	S-S-N Knowledge Exchange (regional workshops) on EE assessment, diagnostics and financing
			C4D platform for collaborative learning on cities
			E-course deliveries, e-discussions, webinars and face-to-face workshops
3. Collaborative Leadership	Support of Regional LED Practitioner Networks in Asia and LAC related to LEDS planning and financing	Regional NAMA Framework for Small Island States	High-level Global South-South-North EE Conference
	Support of AFR LED Practitioner Network with focus on mitigation and adaptation in the context of LEDS	Framework for NAMA Rating & Evaluation Protocol	
		Natural Gas Initiative: Powering a Transition towards a Low Carbon Economy	

KGG

Program Overview: 2013-2016

The Korea Green Growth Program is a \$40 Million Trust Fund which targets three components:

Component 1

- Support the development of national, local and sectoral green growth strategies

Component 2

- Component 2: Support project access to key tools and expertise to promote green, efficient and resilient planning and design of infrastructure projects

Component 3

- Develop cross-cutting data and tools to enable climate-smart development

KGG

A Strategic Partnership

Shared visions to assist World Bank's client countries achieve Inclusive Green Growth by focusing on:

Improving economic growth through greater resource management

- Integrated urban planning and territorial development
- Support difficult challenges to reducing automobility

Increasing resilience to extreme weather events and natural disasters

- Sustainable urban infrastructure and housing
- Support the reduction of risks for green growth in transport and promote green logistics

Increasing global competitiveness through inclusive green growth design and strategy implementation

- Low-carbon and energy efficient city development
- Initiate planning approaches to support urban effective transport flow

Strengthening cooperation between the World Bank and Korea to mainstream global inclusive green growth

- Knowledge sharing and capacity building for green urban growth globally through South South exchange
- Promote behavior shift on transport, reducing motorized transport demand

KGG

Innovative Programmatic Approach for Results

Increased dialogue between the World Bank, Korea and client countries

Engage in the sharing and development of inclusive Green Growth opportunities to avoid lock-ins and help client countries to leap frog

KGGTF and World Bank South-South knowledge sharing

Resulting in virtual and lasting Institutional exchanges, partnerships to share and build green growth knowledge

World Bank, OECD and GGGI already launched the first Green Growth Knowledge platform

KGGP results will be amplified through the Green Growth Knowledge Platform reaching millions

Cooperative nature of the World Bank

Support the capacity of World Bank clients to design, plan and implement green growth initiatives, strategies, and investments through knowledge sharing events
